

Sliding Fee Scale

The Sliding Fee Scale is **based on income and family size**, for qualified mental health or substance use disorder services as established by State Law and Administrative Rules.

Annual Income Limits are based on **2026 Federal Poverty Level** guidelines and are updated annually.

Your **Sliding Fee Scale per session fee amount** is **determined at least annually** and whenever your financial situation changes.

Documentation of your annual household income and family size are required before a final discounted Sliding Fee Scale per session fee amount is approved.

The primary source of income documentation required is your **Federal tax return or current pay stubs** (form 1040).

* Full fee is charged up to the monthly maximum calculated under Michigan Compiled Law 330.1818-1820 and Administrative Rule R330.8242.

** Per session fee is charged per service you receive on a given day. You will be charged for each service you receive up to the monthly maximum.
